

# **CANADIAN WOOD PRESERVATION ASSOCIATION**

# **PROCEEDINGS OCTOBER 2015**

## **About CWPA**

The Canadian Wood Preservation Association was founded on November 20, 1979 in Vancouver, BC. The association was formed to provide a forum and focal point for all people interested in the various aspects of wood preservation, from the producer of pressure-treated poles to the building scientist concerned with decay in leaky buildings. All are dedicated to the conservation of Canada's greatest and most valuable naturally renewable resource – its forest products. With Canada's expanding interest and diversification in wood products and with its expertise in research and development, the CWPA provides a common meeting ground for professional and social discussion.

For more information on CWPA, please see our website: [www.cwpa.ca](http://www.cwpa.ca)
